

NEW PRODUCT FLASH

Now Available: CITGO Is Introducing Two New Products to The Lubricants Line

CITGO QuatraSyn™ Synthetic Transmission Fluid

CITGO QuatraSyn Synthetic Transmission Fluid is the next generation in automatic transmission fluids. This product has been engineered to offer extended service intervals and remain stable under extremely severe operating conditions.

This fluid is intended to be used in the following universal powershift and automatic transmission applications: **school buses and vans, refuse fleets, commercial trucks and vehicles, motorhomes, emergency vehicles, on/off-highway vehicles, inter/intra-city buses, and light duty pickup trucks and passenger cars.**

QuatraSyn is recommended for and meets the performance requirements of:

- GM Vehicles calling for Dexron III
- Ford Vehicles calling for Mercon or Mercon V
- Allison C-4 and TES 295

QuatraSyn provides the following **benefits**:

- Extended drain and filter change intervals resulting in reduced oil disposal cost.
- Outstanding low temperature performance.
- Excellent thermal and oxidation stability resulting in better transmission performance through a reduction in sludge and deposit formation.
- Contains NO viscosity modifiers, therefore has high shear stability.
- Offers low traction coefficients which can result in increased fuel economy.
- Effectively controls oxidation and nitration which creates sludge that thickens the oil, plugs filters and causes excessive foaming.

This product is available in **bulk, 55 Gal drums and 5 Gal pails** through the **OKC** source point as part of the new Synthetic Program. **Material Code # 632493001.** Visit www.citgo.com for up-to-date product information sheet.

CITGO Clarion Food Grade FR Hydraulic Fluid

CITGO Clarion FG FR Hydraulic fluid is a premium ISO 46 water-glycol based fire resistant fluid designed to provide optimum performance in hydraulic systems in applications where a product with NSF H-1 certification is required. This product is

designed **for food process applications that require fire resistant product such as fryers, ovens, cookers and others.**

Clarion FG FR Fluid offers the following **benefits:**

- Meets Factory Mutual's Group 1 (HFC) classification as a less flammable fluid.
- Meets USDA regulations for an H-1 (obsolete) product for use in federally inspected meat and poultry plants.
- Meets NSF specifications for H-1.
- Has the ability to lower overall system temperatures thereby providing better system performance.
- Has the ability to lower power consumption resulting in additional energy savings.
- Exceed FDA 21 CFR 178.3570 for incidental food contact.

This product is now available in **55 Gal drums** at the **Pico Rivera, West Memphis and Atlanta** source points. **Material Code # 632503001.** Visit www.citgo.com for up-to-date product information sheet.
