

New and Improved CITGO FR-40 XD[®] Hydraulic Fluid is Now Morpholine Free!

The new, improved and competitively priced CITGO FR-40 XD Hydraulic Fluid is a fire-resistant, water-glycol fluid developed and designed specifically to operate in high system pressures. It provides maximum fire protection to ensure safe working conditions. Unlike many competitive fluids, CITGO FR-40 XD Hydraulic Fluid is morpholine free.

FEATURES AND BENEFITS

- Excellent corrosion protection – both liquid and vapor phase – of the metals commonly used in hydraulic systems
- Superior heat transfer characteristics of water
- Viscosity-temperature properties, combined with a very low pour point that prevents or minimizes cavitation and cold start pump wear problems associated with fluids having poorer viscosity temperature properties
- Compatible with most conventional seals, gaskets and “O” rings
- Can be mixed with other water-glycol type fluids
- Resistant to oxidation and chemical breakdown
- Will not separate with normal use and storage
- Factory mutual approved as a fire resistant hydraulic fluid
