CITGO and Mystik[®] Become SmartWaySM Community Members

In 2004, the EPA launched SmartWay—an innovative brand that represents environmentally cleaner, more fuel efficient transportation options. This brand identifies products and services that reduce transportation-related emissions and promote fuel economy.

This past August, CITGO and Mystik became SmartWay Community Members, the designation for companies interested in marketing and promoting stewardship and cost reduction potential to their customers.

SmartWay believes the combined effect of low-viscosity synthetic engine lubricants can improve fuel economy by approximately three percent, saving nearly 500 gallons of fuel and eliminating five metric tons of greenhouse gas emissions per year for a typical freight truck.

CITGO products that meet the SmartWay criteria include the CITGO GreenWay family of products, including SynDurance[®], QuatraSyn[®] and synthetic gear oils, SynDurance Synthetic Grease, and Mystik JT-8[®] 5W-40 and SX-7000[®] Synthetic Gear Oil.

In addition, LubeAlert[®] Engine Oil Analysis supports the SmartWay initiative as a critical tool to measure these results.

For more information on the CITGO SmartWay Community Membership, please contact Mark Betner, Heavy Duty Product Manager at 832-486-5737, or e-mail nbetner@citgo.com.
