

Just in case you missed it ...

In the last year Summit has been busy introducing new products and expanding other product lines. As we have increased our presence in the food industry, we added four new barrier fluids: ISO grades 17, 30, 46 & 68 and added HyPar FG-15 – a food grade synthetic blend hydraulic oil. HySyn FG-22 was added to complete the full synthetic food grade hydraulic oil series. EnviroTech FGPL is our bio-based food grade penetrating lube for use on food processing equipment.

IN CASE YOU MISSED IT

We also looked at non-food grade applications. The RHB refrigeration oil series was formulated from an Alkylbenzene synthetic blend with ISO grades 32, 46, 68 & 100 for industrial applications in ammonia service. SHV-46 was added to complete the full synthetic vacuum series. For heavily loaded gears needing micro pitting protection we introduced the Syngear AMP series with ISO grades 150, 220 & 320. As wind energy grows an opportunity opened for a product to clean varnish and sludge deposits in the gear boxes of wind turbines. This led to the development of our Wind Turbine Cleaner. Lastly, the Ultima series was expanded with an ISO 32 for those applications needing a high performance lubricant.

New Products in 2010:

- Barrier Fluid Series** (*ISO grades 17, 30, 46 & 68*)
- EnviroTech FGPL** (bio-based food grade penetrating lube)
- HyPar FG-15** (food grade synthetic blend hydraulic oil)
- HySyn FG-22** (full synthetic food grade hydraulic oil)
- RHB Refrigeration Oil Series** (*ISO grades 32, 46, 68 & 100*)
- SHV-46** (full synthetic vacuum series)
- Syngear AMP** (*ISO grades 150, 220 & 320*)
- Ultima series** (*ISO grade 32*)
- Wind Turbine Cleaner**

Detailed information on any of these products is available in [The Summit Portal](#) or by contacting your Summit representative.

Watch for more new products in 2011 as we continue to innovate and remain an industry leader.
