

Summit “Fill Only With” Tags

Summit is now providing “Fill Only With” plastic tags for most of our Summit lubricants. Each “Fill Only With” plastic tag lists a product series with up to five items on a card. A tag order form is available on the Summit Distributor Portal (for information on the Portal, call to speak with Duffie Monroe).

The plastic tags are black and yellow in color, just like the Summit drums, and come with black plastic ties. They are not like paper tags that will soil, tear or fall off. Many of the major oil companies are providing plastic tags to their distributors, and now they are available for *free* from Summit.

Summit Fill Only With plastic tag benefits:

- Great to prevent lubricant cross contamination of equipment
- A quick reference for the maintenance personnel to know what Summit lubricant to use in each machine
- A great form of in-plant advertising
- Portrays a quality image of Summit products
- Tough, durable 20 mm thick plastic
- Ideal for harsh plant conditions
- Credit card size at 2 1/8” x 3 3/8”
- Identifies the lubricant(s) being used on a specific piece of equipment
- Tags are easy to punch out or mark with permanent ink
- Easily attach to equipment with provided plastic ties
- Summit “Fill Only With” plastic tags are *free* to Summit distributors

To order your Summit “Fill Only With” plastic tags, go to The Summit Distributor Portal ~ Product information ~ Literature request ~ Fill Only With Tag Order Form. Print and fill out the order form, list the quantity of each card needed, then fax the completed form to Rose Spencer.
